

MANUFACTURED HOME PROGRAM

PROGRAM HIGHLIGHTS

Mobile Home and Park Model Program!

It has come to our attention that the valuation for the Park Model Homes are coming in too low for replacement cost.

Although a Park Model is similar to a Mobile or Manufactured home they usually remain under 400 square feet to qualify as a Park Model. In order to determine the proper value for a PM we use a minimum of \$85.00 per square foot.

To ensure proper coverage it is essential when selecting the Manufacturer you select the Model /Make that includes a "P" or "PM" in the system. By choosing correct manufacturer the system will automatically apply a cost factor of \$85.00 square foot. If there are any additions or enhancements to the Park Model you will need to add that as well. This will help determine the value for Replacement Cost.

If you do not see the Manufacturer identified as a "Park Model" please contact Mobile Home Department and one of our Customer Service Representatives will happy to assist you.

We appreciate your support in writing our exclusive program!

We look forward to your submissions.
